SYED MUHAMMAD ANAS MAUDUDI

Backend Developer · Node.js, REST APIs & Databases

tafs4920@gmail.com | Portfolio | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Backend-focused developer with hands-on experience building and maintaining Node.js applications, REST APIs, and database-driven backend services. Comfortable working with server-side technologies, collaborating across frontend and backend, and picking up new codebases quickly. Delivered a live commercial application (Danish Traders) currently serving real customers, alongside multiple Python-based backend projects. Eager to bring this practical, self-driven experience into a structured team environment and grow as a backend engineer.

EDUCATION

A Levels — Wales College — *In progress*

Diploma in Artificial Intelligence and Cloud Native Development — Governor House, Karachi, Sindh — *Feb 2024 – Dec 2025*

O Levels, Computer Science — The American Foundation Cambridge School — *Aug 2022 – Aug 2025*

CORE SKILLS

Backend: Node.js, REST API design & integration, server-side JavaScript

Databases: PostgreSQL, MongoDB, Neon DB, Supabase — schema design & queries

Frontend: React, Next.js, TypeScript, HTML, CSS, JavaScript, web design

Other Languages: Python (OOP), backend scripting

AI & Agents: Prompt engineering, AI agents, LLM integration, RAG

DevOps: Docker, Kubernetes, cloud deployment basics

Practices: Problem-solving, independent debugging, working across existing codebases

PROFESSIONAL EXPERIENCE

Freelance Full-Stack & AI Developer

Self-Employed — Local & Remote Clients | 5 Years Experience

- Built and maintained backend services using Node.js, REST APIs, and relational/NoSQL databases (PostgreSQL, MongoDB, Supabase) for multiple client projects.
- Delivered production-grade web apps for local market clients, including Danish Traders (danishtraders.pk) — a live site currently serving real customers, with full frontend-backend integration.
- Designed database schemas and server-side logic to support scalable, real-world application requirements.
- Collaborated across frontend and backend layers, integrating APIs and third-party services end-to-end.
- Worked independently across the stack — debugging existing codebases and shipping features without oversight.
- Built additional backend systems in Python, including a task-management app with a Python backend deployed on Hugging Face.

GIAIC — *Karachi, Sindh, Pakistan*

AI Startup & Mentor — *Oct 2026 – Present*

Artificial Intelligence Engineer — *Jan 2026 – Present*

Prompt Engineer — *Aug 2025 – Present*

Programmer — *May 2023 – Present*

Senior Frontend Developer — *Jan 2023 – Present*

Web Developer — *May 2023 – Jan 2024*

CERTIFICATIONS & ACHIEVEMENTS

- Claude Academy certifications: Claude 101 · AI Fluency: Framework and Foundations · Claude Code 101
- Passed the aptitude test for the Governor's Initiative for AI, Web 3.0 and Metaverse — among ~50,000 who qualified out of 500,000 test attendees.
- Academic honors: 1st position in grades 4–6; two-time runner-up for O-Level scholarships.

SELECTED PROJECTS

Danish Traders — Live commercial website in production, actively serving real customers. Visit

Scholar Assistant — Python AI student assistant with LLM integration, deployed on Streamlit. Visit

AI Employee Vault — Open-source Python AI agents with tool/function calling (OpenAI Agent SDK). GitHub

AI Travel Designer Agent — Python AI agent planning personalized travel itineraries via LLM reasoning. GitHub

Career Mentor Agent — Python AI agent providing conversational, context-aware career guidance. GitHub

Game Master Agent — Python AI agent built with OOP design, driving an interactive fantasy adventure narrative. GitHub

Full-Stack Todo App — Task manager with a Python backend deployed on Hugging Face. Visit

Anas Baba Express — Full e-commerce app with cart, catalog, and API integration. Visit
